

CULTIVATING FARM TO EARLY CHILDHOOD

Integrating Farm to School Concepts into Your Early Childhood Program

May 2, 2020 • 8:45AM–2:45PM
Hartland Recreation Center
19 Route 12, Hartland, VT 05048
\$10 fee includes snacks, lunch & materials
Register @ vtfeed.org/FTECmay2020

Cultivating Farm to Early Childhood (FTEC) is an opportunity for **you** — Family Child Care, Head Start, Center-Based and Public Pre-K educators — to explore and expand your personal and professional experience related to agriculture and nutrition programming while building and strengthening community connections.

You'll immerse yourself in hands-on, child-centered learning experiences like pickling, taste testing, and wool felting! We'll align activities with practical discussions for community networking with local farmers and food system experts to build your FTEC knowledge.

Learn how FTEC concepts help meet multiple standards across licensing, CACFP, VELs and STARS by promoting children's learning in social emotional well-being, healthy eating habits, family engagement and community building. **These training hours count for both BFIS and CACFP training hours.**

A professional development opportunity designed for the Rozo McLaughlin Farm to School Program generously supported by Vermont FEED, and the Vermont Agency of Agriculture, Food & Markets. Vermont FEED is farm to school partnership project of Shelburne Farms and NOFA-VT.
